POOLS - CX
(PRODUCING OPEN ONLINE LEARNING SYSTEMS FOR CENTERS OF EXCELLENCE) – 2010-1-RO1-LEO05-07447
February 1st, 2011 - January 31st, 2013

![pools-cx Click, Learn and Teach! logo]

- POOLS - CX is a Leonardo supported TOI (Transfer of Innovation) project based on the POOLS project (2005-2007).

- The project translates and adapts the POOLS project core results: Course Book on CALL (Computer Assisted Language Learning), Course Description, DIY (Do It Yourself) videos, and CALL units that demonstrate how to produce CALL materials.

- POOLS - CX covers modern European languages including LWUTL (Less Widely Used and Taught Languages).

- The emphasis on communicative language teaching encourages language learning in vocational contexts.

- POOLS - CX adds value by adding three more languages: Italian (IT), Greek (GR), and Turkish (TR).

- The transfer of innovation is not just a translation and adaptation exercise.

- After adapting the POOLS core outcomes (Course Book, Course Description, DIY videos, and CALL units), course participants from EL, IT, and TK are coached in video recording and editing techniques, in software production, and in CALL methodologies suitable for CLIL (Content and Language Integrated Learning), and task based learning.

- The course participants then produce videos that can be used in multimedia applications for computer assisted language learning in EL, IT and TK.

- Based upon the experience and expertise acquired by POOLS Center of Excellence in the University of Pitesti, the project aims at creating and developing Centers of Excellence in Italy, Greece, and Turkey.
- The transfer of innovation is also taking advantage of the expertise acquired in POOLS by the British, Danish, and Romanian partners.

- The project also wants to promote and exploit CALL (Computer Assisted Language Learning) and CLIL (Content and Language Integrated Learning) in Italy, Greece, and Turkey.

- The project partnership also searches for other language projects and networks that may cluster with our efforts and benefit from the POOLS CX outcomes.

- The project website, **www.poolscx.eu** is linked with the existing POOLS website - **www.languages.dk**.
