Best Practice - Best Language Teaching Method

The Best Practice – Best Language Teaching Method project clearly demonstrates the value of EfVET as a dissemination partner. Among the many advantages are:

- ★ Use of the EfVET office facilities in Brussels for meetings
- ★ Guaranteed access to give workshops at EfVET conferences
- ★ Use of EfVET website for advertising the project
- ★ Use of EfVET Internet communication centre for e-mail lists, debate, exchange of documents etc.
- ★ Dissemination through the EfVET Newsletter

www.languages.dk/methods

The teaching materials will be available for teaching: Basque, Danish, Dutch, English, Gaelic, German, Romanian, and Spanish. Products planned in the project are:

- A video library (DVD and VHS) with commented recordings of the methods used in classes.
- A manual with method descriptions, instructions and ready to copy and use materials
- A website with:
 - the materials, manual (in .html and .pdf format) and videos (in streaming format)
 - discussion areas where teachers can comment and share advice on the different methods
 - notice board where teachers can share materials and propose new methods and ideas
 - e-mail lists through which teachers can discuss, follow the debate and know when new materials have been added

All materials will be available for download from the project website www.languages.dk/methods without any charge!

Best Practice - Best Language Teaching Method - a Leonardo II Project

The project partners will develop materials for teaching lesser taught languages - with DVDs and streaming video visualizing the teaching methods

Difficulty with foreign languages is by far the most feared problem when young Europeans contemplate working or studying abroad. Language is a key instrument for a common understanding between citizens of Europe and for exploiting the rich cultural heritage of Europe.

In 2000 a survey among teachers in the EU countries showed that teachers of less taught languages have little pedagogical and methodological training and the course materials for these languages were rarely communicative in nature. The survey emphasized the need for improvement in this area.

The main project target group is teachers of the less taught languages in technical colleges. Often these teachers are not educated as language teachers thus not making use of effective communicative language teaching methods. Apprentices from the iron and metal crafts and Building and construction will also benefit from a better language teaching before they go to other European countries as part of their college training or work placement periods. Even very basic language skills can provide a way for understanding culture and for personal relations.

The project wants to transfer the best practice of language teaching methods to the teaching of less taught languages like Basque, Danish, Dutch, Gaelic and Romanian.
