

Copyleft agreement

All materials produced as part of the Methods project are CopyLeft. CopyLeft is in this project understood as a way to license a work so that unrestricted redistribution, copying, and modification is permitted, provided that all copies and derivatives retain the exact same licensing.

Each partner is responsible for ensuring that all resources produced in the pool-m project are CopyLeft. This includes resources produced by third parts, e.g. student produced materials.

I agree on the above terms for resources produced by me as part of the Methods project and it is my responsibility to ensure that all materials I produce as part of the project are CopyLeft (e.g. graphics, photos, video, audio, and texts)
