

Hello, I'm Nick Degn Pedersen, and I'm 19 years old

My name is Sean Petersen, I'm 22 years old

Hello, my name is Jonas Olsson and I'm 23 years old

Together we are 4more productions

We met one another at Odense Tekniske Skole where we attended the basic training course.

We were placed in the same group and had to work on a project and try to make a commercial video for a so-called firm. It ended with our finding one another and now we work together.

After completion of the basic training course we decided to create a firm between us, which we call 4more productions

The advantage of having met one another at Odense Tekniske Skole is that there have been good possibilities for borrowing equipment.

We have received good guidance and we have had free reins to do the things we have wanted to do as long as there has been a sensible subject related content.

Little by little we have established a good friendship and are now starting a firm.

Our firm will be offering a wide range of products like.. Within video we will be able to offer promotion videos, wedding videos, and we'll be able to offer music videos, and exhibition videos.

Within graphics design we can among other things offer production of home pages, flyers, business cards, posters, brochures, DVD covers, and CD covers.

Apart from that we also have a sound side, i.e. we apply speaks to different items. We produce music, make jingles, and background music for the different films that we also produce.

We have done many different things during the year. Among other things we have made a music video for the singer Gilos, we have, however, not quite finished the editing, but expect to go to Barcelona in the summer to do the remaining recordings and then finalize the editing.

For the present we are in the process of making another music video for a group called Chris Greys, we have most of it in the box so far, and have filmed the lead singer Chris Greys in two locations and still have a couple more to do.

Apart from that we have made a promotion video for a dancing group called Genetic Tension, which they use for booking shows,

We have also made a stable-washing video, which is more like a kind of promotional exhibition video, which they use in various stands when they are selling their machines.

We have a photographer in the group, so we can also offer photography and picture processing.

Our force is that we can group all these things in a firm too, and that we can buffer for one another and use one another as freelancers.

In the future we hope to go out and make money with the firm 4more productions by producing videos and all the other things that we offer within the media professions.

Together we are 4more productions.
