Milestones and Deliveries in the project November 2002 - December 2003

Project DVDs and CD-ROMs on display. To order a copy e-mail ka@ots.dk

The pile of project materials produced during the first project year - Now ready for sending with the interim report

Frans van Schaik demonstrating the "Student Travel Guide" at the EfVET 2003 conference. After his presentation the guides, DVDs and CD-Roms were handed out. Simultaneously with his presentation other BP-BLTM presentations were given by the Basque, German, Spanish, and Danish teams

Since the project start in November 2002 the BP-BLTM project has produced a large number of outputs to be used and tested by colleagues all over the world.

In the first interim period we have worked with two language teaching methods; Computer Assisted Language Learning In Context and Task Based teaching. The manuals in English, German, Romanian, and Spanish describing the two methods are available for download from this address: www.languages.dk/methods/methods.html

For each of the two described methods we have developed teaching materials in the eight project languages. These materials can be accessed / downloaded from this address: www.languages.dk/methods/materials.html

In case of slow Internet connection European users can order a free CD-ROM with the website content by emailing ka@ots.dk OR download the website image from this address: www.bpbltm.uhi.ac.uk/ Also our many overseas users are welcome to order a copy of the CD-ROM (In case of a large number doing so we may have to ask for a small fee to cover p.p.)

We have produced two DVDs; one for each of the methods showing real students using the developed materials. The DVDs can be ordered by e-mailing ka@ots.dk OR you can download the DVD images (1Gb each) from: www.bpbltm.uhi.ac.uk/video

A Leonardo 2 Project

Leonardo da Vinci

Computer Assisted Language Learning In Context, **DONE**
Task Based Teaching: **DONE**
Student travel guide, **DONE**
Simulations, Tandem Learning, and PhyEmoC - **on schedule**

The international work placement preparation guide for students and the Simulations Manuals

The German team member, Klaus Leonhardt giving a demonstration of the BP-BLTM products during the EfVET 2003 Conference

Demonstration at the EfVET conference of the two project DVDs

One of the three round table demonstrations given by Klaus Leonhardt and Kent Andersen during the EfVET 2003 Conference.

T he first two project DVDs are commented in English with subtitles in English, German, Romanian, and Spanish. On the first DVD one of the units has eight sound tracks with eight subtitles.

The videos from the two DVDs are also available as streaming media from the project website (and on the project CD-ROMs):

The video describing task based learning can be seen with English subtitles here: www.languages.dk/methods/call/Video_TBL_medium.html

Or with German subtitles here: www.languages.dk/methods/call/Video_TBL_medium_de.html

The video describing Computer Assisted Language Learning can be seen with English subtitles here: www.languages.dk/methods/call/Video_Call_medium.html

Or with German subtitles here: www.languages.dk/methods/call/Video_Call_medium_de.html

S ince the first project year the project teams have continued the work:

The Romanian team is describing the PhyEmoC method the manual will be available in English by January 15th.

The Dutch team has just finished describing Tandem Learning.

The Tandem Learning manual can be downloaded in English here: www.languages.dk/methods/tandem/eTandem_syllabus_en.pdf

The Scottish team has also just finished decsribing their method; Simulations.

The Simulation manual can be downloaded in English here: www.languages.dk/methods/documents/Simulation_Manual.pdf

All the teams have been busy working on the interim report, which can be downloaded here: www.languages.dk/methods/documents/Interim_Report_BP-BLTM.pdf

We have recently opened an area in the project website where our friends can share ideas and materials. Please visit the users' page: www.languages.dk/methods/users.html

The project has delivered lots of material, but we are also conscious of project quality and would like you to help us evaluate our work. If you are interested and could spare half an hour filling in an evaluation form then please e-mail Kent Andersen ka@ots.dk The first evaluators receive a project T-shirt;-)
